

MC10+™

Underfloor and Central Heating System BIOCIDES

High performance *MC10+* from ADEY, prevents the formation and growth of bacterial contamination, algae and micro-organisms in underfloor and central heating systems. *MC10+* delivers advanced levels of protection, with a higher concentrated formula, as one bottle treats 125 litres.

- High performance dual biocide and fungicide
- Prevents bacterial contamination and algae
- Concentrated formula, treats 125 litres
- Designed for all heating systems including underfloor
- Compatible with all ADEY MC products
- Ensures efficient system operation

Physical and chemical properties

Appearance:	Liquid
Colour:	Colourless
Odour:	Slight
Solubility:	Miscible
pH Value:	4 - 5
Relative Density:	1.01

Product uses

Prevention of the formation of bacterial contamination, algae and micro-organisms within all heating and cooling systems including underfloor. Compatible with all rubbers and other non-metallic components.

How to use

500ml of *MC10+* will treat up to 125 litres or 100m² of underfloor heating.

Introduce *MC10+* to the system via the filling loop or radiator using a suitable injector, or via a *MagnaClean* filter. For open vented systems *MC10+* can be added via the F&E tank, remembering to remove sufficient water via the drain-point to ensure *MC10+* enters the system circuit.

For previously untreated or sludged systems, cleaning as recommended in BS7593 using ADEY *MagnaCleanse*® and *MC3+*.
N.B. NOT for use in single feed indirect cylinders.

Application

MC10+ is suitable for all sealed and open vented heating systems. *MC10+* is not suitable for use in single feed indirect "primatic" cylinders where potable water treatment is required.

Packaging, handling and storage

Available in 500ml plastic containers.

WARNING: May produce an allergic reaction. Causes serious eye irritation. Harmful to aquatic life with long lasting effects. EUH208: Contains mixture of 5-chloro-2-methyl-2h-isothiazol-3-one and 2-methyl-2hisothiazol-3-one.

Keep out of reach of children. Wash contaminated skin thoroughly after handling.

Wear protective gloves/protective clothing/eye protection/face protection. Avoid release to the environment. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. Dispose of contents/container to according to local/national regulations.
